

## **PUBLICATIONS (ordre chronologique)**

Réponse alimentaire à long et court termes à la glucopénie induite dans l'hypothalamus latéral et ventromédian du rat.

Lagaillarde Michèle ; D.E.A. de Neurosciences, Paris VI ; Septembre 1981.

Contribution à l'étude du stimulus métabolique initiateur du repas chez le rat.

Lagaillarde Michèle ; Thèse de l'Université Paris VI, (nouveau diplôme de Doctorat en Sciences de la Vie et Santé), Décembre 1985.

Stress et Alimentation.

Chabert Michèle, Cah. Nutr. Diét., 24(2), 129-134, 1989.

Learned caloric adjustment of human intake.

Louis-Sylvestre J., Tournier A., Verger P., Chabert M., Delorme B., Hossenlopp J. ; *Appetite*, 12, 95-103, 1989.

A method for long-term and accurate measurement and recording of the blood glucose level in man.

Chabert M., Verger P., Louis-sylvestre J. ; *Physiol. Behav.* 49(4), 827-830, 1991.

Monosodium glutamate as a palatability enhancer in the european diet.

Bellisle F., Monneuse M-O., Chabert M., Larue-Achagiotis C., Louis-Sylvestre J. ; *Physiol. Behav.* 49 : 869-873, 1991.

Feeding behavior in rats on a complete diet containing Concanavalia.

Larue-Achagiotis C., Martin C., Verger P., Chabert M., Louis-Sylvestre J. , *A.Repr.Nutr.Dev.* 32,343-350,1992

Effects of acute treadmill exercise and delayed access to food on food selection in rats.

Larue-Achagiotis C., Martin C., Verger P., Chabert M., Louis-Sylvestre J. ; *Physiol. Behav.* 53,403-408,1993.

Effect of a fat-reduced dish on 24h energy and macronutrient intake.

Louis-Sylvestre J., Tournier A., Chapelot D., Chabert M., *Appetite* 21(3),102-108,1993

Fat content of spontaneous food choice following consumption of fat-reduced foods.

Louis-Sylvestre J, Chabert M, Larue-Achagiotis C.

*Appetite*. 1994 Jun;22(3):280-2.

Comportement alimentaire chez l'homme : rôle de certains facteurs environnementaux

Louis-Sylvestre J, Bonnefond F-H, Chabert M.

*Annales du Colloque Annuel Valicentre, Chambray les tours, 1994, p55-64.*

Cephalic phase responses to sweet taste

Abdallah L., Chabert M., Louis-Sylvestre J., *Am.J.Clin.Nutr.* 65,737-743,1997

Is pleasantness of Biscuits and Cakes Related to their Actual or to their Perceived Sugar and Fat Contents?

Abdallah L., Chabert M., Le Roux B., Louis-Sylvestre J., *Appetite*, 30, 309-324, 1998.

Cross-correlation between plasma leptin and biological parameters involved in the spontaneous intermeal interval.

Chapelot D., Aubert R., Marmonnier C., Chabert M., Louis-Sylvestre J., *Internatinal Journal of Obesity*, 24 (Suppl 2),S129-S130, 2000.

An endocrine and metabolic definition of the intermeal interval in humans: evidence for a role of leptin on the prandial pattern through fatty acid disposal.

Chapelot D, Aubert R, Marmonnier C, Chabert M, Louis-Sylvestre J. *Am J Clin Nutr.* 2000, 72(2): 421-31.

Human apolipoprotein A-II associates with triglyceride-rich lipoproteins in plasma and impairs their catabolism.

Dugue-Pujol S, Rousset X, Pastier D, Quang NT, Pautre V, Chambaz J, Chabert M, Kalopissis AD. *J Lipid Res.* 2006 Dec;47(12):2631-9.

Apolipoprotein A-II is catabolized in the kidney as a function of its plasma concentration.

Dugue-Pujol S, Rousset X, Chateau D, Pastier D, Klein C, Demeurie J, Cywiner-Golenzer C, Chabert M, Verroust P, Chambaz J, Chatelet FP, Kalopissis AD. *J Lipid Res.* 2007 Oct; 48(10):2151-61.

Postprandial metabolic and hormonal responses of obese dyslipidemic subjects with metabolic syndrome to test meals, rich in carbohydrate, fat or protein.

El Khoury D, Hwalla N, Frochot V, Lacorte JM, Chabert M and Kalopissis AD. *Atherosclerosis.* 2010;210(1):307-313.

Transient micro-elastography: a novel non-invasive approach to measure liver stiffness in mice.

Bastard C., Bosisio MR., Chabert M., Kalopissis AD., Mahrouf-Yorgov M., Gilgenkrantz H., Mueller S., Sandrin L. *World J Gastroenterol.* 2011 February 28; 17(8): 968-975.

Apolipoprotein A-II is a key regulatory factor of HDL metabolism as appears from studies with transgenic animals and clinical outcomes.

Maïga SF, Kalopissis AD, Chabert M. *Biochimie.* 2014 Jan;96:56-66. doi: 10.1016/j.biochi.2013.08.027. Epub 2013 Sep 5. Review.

D25V apolipoprotein C-III variant causes dominant hereditary systemic amyloidosis and confers cardiovascular protective lipoprotein profile.

Valleix S, Verona G, Jourde-Chiche N, Nédelec B, Mangione PP, Bridoux F, Mangé A, Dogan A, Goujon JM, Lhomme M, Dauteuille C, Chabert M, Porcari R, Waudby CA, Relini A, Talmud PJ, Kovrov O, Olivecrona G, Stoppini M, Christodoulou J, Hawkins PN, Grateau G, Delpech M, Kontush A, Gillmore JD, Kalopissis AD, Bellotti V.

A transgenic mouse model reproducing human hereditary systemic amyloidosis.

Michèle Chabert, Xavier Rousset, Magali Colombat, Michel Lacasa, Hermine Kakanakou, Mathilde Bourderieux, Pierre Brousset, Odile Burlet-Schiltz, Juris J. Liepnieks, Barbara Kluge-Beckerman, Gilles Lambert, François-Patrick Châtelet, Merrill D. Benson, Athina-Despina Kalopissis. *Kidney International.* 2019 Sep;96(3):628-641. doi: 10.1016/j.kint.2019.03.013.

Obesity and Responsiveness to Food Marketing Before and After Bariatric Surgery.

Yann Cornil, Hilke Plassmann, Judith Aron-Wisnewsky, Christine Poitou-Bernert, Karine Clément, Michèle Chabert, Pierre Chandon. *Journal of Consumer Psychology*, First published: 23 January 2021; doi: 10.1002/jcpy.1221.
